

TOP FIVE REASONS TO ATTEND INFORUM 2008

You're invited to attend **Inforum 2008**—a dynamic gathering of Infor customers, partners, and Infor team members. Come together to share, network, and learn more about Infor products, solutions and business dynamics to help you do business better.

Here are the top five reasons you can't afford to miss this event:

- 1 **Education and training sessions, tailored to you.** Three full days of intensive learning, with sessions matched to your industry, your challenges, and your Infor product focus. From best practice discussions to detailed product sessions, you'll gather ideas and insights that you can implement immediately. Look for your [Inforum Connection](#) to maximize your conference experience.
- 2 **More computer-based product training.** We'll be offering hands-on learning from Infor educators throughout the conference plus an optional, dedicated full-day on Friday October 17. This is a cost-effective way to learn more about the Infor products you own in a classroom setting.
- 3 **A chance to network with your peers. Inforum offers you a chance to share best practices and approaches with more than 6,000 Infor customers. We've built our networking activities around** your interests and requests, so you're bound to find the setting that meets your needs. From the [Enterprising Square](#) to the new ["Let's do Lunch"](#) program and [Birds-of-a-Feather](#) sessions, along with informal networking in the [Solutions Expo](#) and in the classroom, you'll have a chance to make the right connections to help you do business better.
- 4 **Solutions Expo focused on your solution area.** This year, the Infor exhibits and Infor Partner exhibits are organized by the [Inforum Connections tracks](#) to help you find the most relevant areas for increasing your knowledge. With over 70 exhibit areas and even more demo stations, this is a "don't miss" opportunity.
- 5 **The biggest and best way to get to know Infor.** Inforum 2008 is the largest gathering of Infor customers, partners, and team members ever. You'll get a chance to learn more about your product's direction and industry best practices; discover other Infor solutions that address your new business challenges; and find out about the future technology direction of Infor's product portfolio. You'll get a chance to hear expert insights, learn about all Infor's solutions, and make connections not available anywhere else.

If you're interested in doing business better, you can't afford to miss Inforum 2008.

CRITICAL CONNECTIONS YOU CAN'T AFFORD TO MISS.
